

IN THE CLAIMS:

Please amend claims 1, 2, 14-18, 30-32, 34-36, and 39-41 as follows. For the Examiner's convenience, a complete set of all claims now pending in their amended form, with markings to identify changes made by the amendments herein, is provided at the end of this response under the heading, "VERSION WITH MARKINGS TO SHOW CHANGES MADE."

B¹

1. (Twice Amended) A method for processing telephone calls for a mobile subscriber associated with a wireless network, the method comprising:
receiving from the mobile subscriber user-defined, location-dependent rules associated with at least one telephone service subscribed to by the mobile subscriber;
determining a current location of the mobile subscriber; and
processing the telephone services based on the user-defined, location-dependent rules and the current location of the mobile subscriber.

2. (Twice Amended) The method as recited in claim 1 wherein receiving the user-defined, location-dependent rules comprises:
receiving from the subscriber a specification for at least one geographic area associated with the mobile subscriber; and
receiving from the subscriber rules for processing the at least one telephone service for the mobile subscriber when the mobile subscriber is in one of the geographic areas.

B²

14. (Twice Amended) The method as recited in claim 1 wherein processing a telephone call comprises:
receiving an outgoing call from the mobile subscriber; and
processing the outgoing call based on the user-defined, location-dependent rules and the current location of the subscriber.

15. (Twice Amended) The method as recited in claim 1 wherein processing a telephone call comprises:

receiving an incoming call for receipt by the mobile subscriber; and
processing the incoming call based on the user-defined, location-dependent rules and the current location of the subscriber.

16. (Twice Amended) The method as recited in claim 1 further comprising:

determining supplemental subscriber information from the mobile subscriber; and

wherein processing a telephone call further comprises processing the telephone call based on the supplemental subscriber information, the current location of the subscriber and the user-defined, location-dependent rules.

17. (Twice Amended) A system for processing telephone services for a mobile subscriber associated with a wireless network, the system comprising:

a database for storing user-defined, location-dependent rules associated with at least one telephone service subscribed to by the mobile subscriber; and

service logic for determining a current location of the mobile subscriber and generating call processing instructions for processing telephone calls based on the user-defined, location-dependent rules and the current location of the mobile subscriber.

18. (Twice Amended) The system as recited in claim 17 further comprising an interface operable to receive from the mobile subscriber a specification for at least one geographic area associated with the mobile subscriber and rules for processing the telephone services for the mobile subscriber when the mobile subscriber is in one of the geographic areas.

consider

B3

30. (Twice Amended) The system as recited in claim 17 wherein the service logic, in processing telephone calls, is further operative to receive an outgoing call from the mobile subscriber, and process the outgoing call based on the user-defined, location-dependent rules and the current location of the subscriber.

31. (Twice Amended) The system as recited in claim 17 wherein the service logic, in processing telephone calls, is further operative to receive an incoming call for receipt by the mobile subscriber, and process the incoming call based on the user-defined, location-dependent rules and the current location of the subscriber.

32. (Twice Amended) The system as recited in claim 17 wherein the service logic is further operative to determine supplemental subscriber information from the mobile subscriber and process telephone calls based on the supplemental subscriber information, the current location of the subscriber and the user-defined, location-dependent rules.

B4

34. (Once Amended) The method as recited in claim 1, wherein the at least one telephone service includes caller identification.

35. (Once Amended) The method as recited in claim 1, wherein the at least one telephone service includes call forwarding.

36. (Once Amended) The method as recited in claim 1, wherein the at least one telephone service includes do not disturb.

B5

39. (Once Amended) The system as recited in claim 17, wherein the at least one telephone service includes caller identification.

40. (Once Amended) The system as recited in claim 17, wherein the at least one telephone service includes call forwarding.
